

OHIO'S ACADEMIC CONTENT STANDARDS:

In June, 2010, the State Board of Education of Ohio adopted state standards for the core content areas. The English Language Arts and Mathematics standards are National standards with a maximum of 15% additional Ohio standards. The Social Studies and Science standards have been developed with the leadership of consultants from the Ohio Department of Education, teachers from the universities and schools throughout the state and various content-driven organizations. During the development of all standards, there has been public input into the content and process.

The development of the standards has been divided into three stages:

1. Phase I – Standards Revision. Adopted by the State Board of Education of Ohio on June 7, 2010.
2. Phase II – Development of the Model Curriculum
 - a. Content Elaborations and Learning Expectations.
 - b. Instructional Strategies and Resources
3. Phase III – Development of Assessments
